

## The Collaborative Assessment & Management of Suicidality (CAMS)

### What is CAMS?

**CAMS is an evidenced-based treatment framework used to assess suicidality and specifically treat suicide risk.** CAMS 3-part training provides mental health professionals (and other relevant professionals) with essential knowledge in using the CAMS framework to collaborate with patients in the treatment of their suicidal drivers.

**6 published correlational studies & an RCT support the effectiveness of CAMS in reducing patients' suicidal drivers.**

-- Jobes, D. A. (2012). The Collaborative Assessment and Management of Suicidality (CAMS): an evolving evidence-based clinical approach to suicidal risk. *Suicide and Life-Threatening Behavior*, 42(6), 640-653.

### What Does CAMS Training Include?

#### CAMS' 3-part training includes:

- 1) **A 3-4 hour, self-paced online course:** This course features a series of videos which provide an overview of the CAMS model. Completion of the online course is required prior to in-person, role-play workshop.
- 2) **An in-person, 1 day workshop:** An experienced CAMS Consultant will train participants in using the CAMS framework through role-play where participants take turns acting as both counselors and patients.
- 3) **Group consultation calls:** Following the workshop, group phone calls will be held for 8 weeks, providing opportunity to discuss successes and challenges as participants implement the CAMS model.

**Upon completion of role-play workshop, participants will receive 10 CEUs.** The OhioMHAS Continuing Education Committee is an approved provider of Continuing Education Unites (CEUs) for RNs, LPNs, Ohio Counselors, Marriage & Family Therapists, Social Workers, Chemical Dependency Professionals, and Psychologists.
