5010 835 Upgrade

Sent on: January 4, 2012

Background:

Application changes to correct all known issues surrounding the 5010 835 process have been updated in Production.

- 5010 835 files with a postdate of 12/12/11 were created on 01/02/12. Those files have an extension of 00212.
- 5010 835 files with a postdate of 12/19/11 were created on 01/03/12. Those file have an extension of 00312.
- 5010 835 files with a postdate of 12/27/2011 were created on 01/04/12. Those files have an extension of 00412.
- The mCPE 835s for the post dates of 12/12/11, 12/19/11 and 12/27/11 will be loaded on 01/04/12 for certification.
- Please disregard all prior 5010 835 files that you may have received with postdates of 12/12/11 and 12/19/11.
- One caveat between the 4010 and 5010 835s is when multiple detail lines with the same postdate exists for a single claim. The current 4010 creates a CLP segment for each SVC segment. The 5010 will create a single CLP segment with multiple SVC segments.
