Title of Lesson: Mental Illness Overview

Assigned Course Number: TBD

Author: Megan Testa, M.D., Richard Cirillo, Ph.D.

Date Written/Revised 12/9/16, 12/15/16; 2/1/17

Approving Authority: PENDING

Overview:
The Mental Illness Overview is a 2 ½ hour-long presentation which will be contained in the eight-hour program: “Responding to Crises”. The Mental Illness Overview will contain the following major elements:

1. Understanding the nature of mental illness including that it takes multiple forms, the significance of it in the lives of individuals, families and society, and that understanding mental illness takes study, practice and discussion
2. Identify behaviors and key symptoms which are indicative of Schizophrenia and understand the major treatment approach to schizophrenia as well as barriers to effective care.
3. Identify behaviors and key symptoms which are indicative of Major Depressive Disorder, the major approaches to treatment, and factors related to suicide.
4. Identify behaviors and key symptoms which are indicative of Bipolar Disorder and how it is treated.
5. Brief overview of Borderline Personality Disorder and the challenges which it can present to law enforcement
6. Identify the behaviors and symptoms related to Posttraumatic Stress Disorder as well as the enduring behavioral and health impact of stress on children, adolescents and adults.

Course Goal(s):
The goal of the Mental Illness Overview is to provide participants with enough knowledge and awareness to identify the likelihood of a severe mental illness or behavioral disturbance that has a strong likelihood of being attributable to a severe mental illness.

Course Objective(s):
Upon completion of the Mental Illness Overview participants will be able to demonstrate knowledge of the following:

1. Mental illness takes many forms and impacts individuals, families, and the broader community
2. Behaviors suggestive of Schizophrenia and identify appropriate intervention techniques
3. Behaviors suggestive of Bipolar Disorder and identify appropriate intervention techniques
4. Behaviors suggestive of Major Depressive Disorder and identify appropriate intervention techniques
Cleveland Division of Police
Lesson Plan (version 2/1/17)

5. Behaviors associated with Borderline Personality Disorder and the challenges which it can present to law enforcement
6. Behaviors suggestive of Posttraumatic Stress Disorder and identify appropriate intervention techniques
7. The impact of stress on children, adolescents and adults and how that impact can challenge law enforcement.

Methodology:
Participants will be taught by a pair of instructors: a law enforcement officer and one mental health professional. A power point presentation will serve as an instructional aid and will include short video examples as well as basic outlined points. The instructors will also use class discussion to increase participant interest and involvement.

Target Audience:
All members of the Cleveland Division of Police

Class Size:
TBD

Evaluation Process:
Participants will complete a post-test which will examine acquisition of key points. Participants will be required to answer at least 70% correct. In addition, instructors will have the option of supplementing the evaluate in the event that there is an unwillingness to attend to the material and/or participate at a meaningful level.
