Cornerstone of Hope has recognized a great need for a support group for families that have lost a loved one to accidental overdose. This unique loss can leave families with many unanswered questions along with a myriad of difficult emotions. This group hopes to bring people together who have experienced similar losses, offer some education about the addiction process, offer support for the numerous emotional reactions to this particular loss, and provide some helpful insight into moving forward with hope.

We provide the opportunity for you to join an inclusive group of individuals, who share common experiences.

Open to all, regardless of ethnic, cultural & faith backgrounds. Led by professionally trained and experienced facilitators. Session is six weeks in length and each meeting is 2 hours. For any questions, please contact us at 216.524.4673.
